

Champion Hills implemented ClubSoft in April 2008. Controller Pat Weyandt reported:

"Our club purchased ClubSoft mainly because we were tired of having separate systems that weren't connected. We wanted our Golf Pro Shop and Food & Beverage POS to be an integrated part our club management system.

Now with ClubSoft, all of our managers throughout the club have access to the same data, the same system. It's so easy to manage member information changes and keep all areas of our club connected and up to date.

The real-time member features on our web site allow members to view and update their personal information and preferences, view their minimum details, current charges, credit book, gift card balances and member statements. It effectively enables them to answer their own questions, and translates into less work for our team at the club.

"Now with ClubSoft, all of our managers throughout the club have access to the same data, the same system. It's so easy to manage member information changes and keep all areas of our club connected and up to date."

We haven't experienced any problems with our system, but the support team is wonderful.

They take care of any questions we have right away or provide regular updates to follow up until our inquiry is resolved.

One of the best things about ClubSoft is the regular updates. They just happen! I login to ClubSoft and a message alerts me my system has been upgraded and provides me a list of what new enhancements and features are now available."

Weyandt added, "Linda Najera, our ClubSoft representative, is the most up front salesperson I have ever worked with. She focused on how our club was unique, while also reviewing during our install on how we could improve our business practices. The commitment by Linda and the entire ClubSoft team has made all the difference over the past two years."
